1983 INDICES

Volume 15 — 1983

Author Index

NOTE: All authors are listed; title is given under first author only. Numbers in parentheses give issue number and page.

ADIRI, I. (No. 3, 231) Route-Dependent Open-Shop Scheduling (with AMIT)

AHN, SEOKYOO (No. 2, 91) see SARIN

AKINC, UMIT (No. 1, 31) An Algorithm for the Knapsack Problem

ALTIOK, TAYFUR (No. 4, 292) The Allocation of Interstage Buffer Capacities in Production Lines (with STIDHAM)

AMAR, AMAR DEV (No. 3, 261) see VASILESCU

AMIT, N. (No. 3, 231) see ADIRI

ASKIN, RONALD G. (No. 1, 19) see BUCK

AUSTIN, LARRY M. (No. 4, 363) see SEN

BAHL, HARISH C. (No. 2, 136) Column Generation Based Heuristic Algorithm for Multi-Item Scheduling

BRADY, STEPHEN D. (No. 3, 242) Interactive Graphical Minimax Location of Multiple Facilities with General Constraints (with ROSENTHAL and YOUNG)

BROWN, J. F. (No. 2, 156) Hysteresis Repair in Discounted Replacement Problems (with MAHONEY and SIVAZLIAN)

BROWN, LARRY G. (No. 4, 305) see CHANG

BUCK, JAMES R. (No. 1, 19) Advances in Sequential Bayesian Work Sampling (with ASKIN and TANCHOCO)

BUCK, JAMES R. (No. 2, 119) Optimum Stratified Cycle Counting (with SADOWSKI)

BULFIN, R. L. (No. 3, 217) Fuel Allocation in Processing Copper Ore (with DeMARS)

BULFIN, R. L. (No. 4, 337)see VILLARREAL

CHAKRAVARTY, AMIYA K. (No. 3, 223) Lot Sizing with Several Groups of Single-Cycling Retailers and One Warehouse

CHANG, B. C. (No. 2, 99) Price-Adjusted Attribute Single Sampling with Polynomial Indifference

CHANG, C. ALEC (No. 4, 305) Analysis of Buffering Techniques in MRP Systems with a Matrix Loading Model (with BROWN and JOHNSON)

DeMARS, T. T. (No. 3, 217) see BULFIN

DEUERMEYER, B. L. (No. 2, 150) see FOSTER

DREZNER, ZVI (No. 4, 300) Constrained Location Problems in the Plane and on a Sphere

ELZINGA, D. J. (No. 1, 81) On Stopping Rules for Facilities Location Algorithms (with HEARN)

FOSTER, J. W., III (No. 2, 150) Mean-Life Indifference Pricing for Quantity Purchases (with DEUERMEYER and IP)

FOSTER, J. W., III (No. 3, 202) Markovian Models for Investigating Failure and Repair Characteristics of Production Systems (with GARCIA-DIAZ)

GARCIA-DIAZ, ALBERTO (No. 3, 202) see FOSTER

GERSHWIN, STANLEY B. (No. 4, 353) see KIMEMIA

GHANDFOROUSH, PARVIS (No. 4, 363) see SEN

GOLD, BELA (No. 1, 63) Practical Productivity Analysis for Management: Part II. Measurement and Interpretation

GOODRICH, JERRY L. (No. 4, 330) see MAUL

GROSS, DONALD (No. 4, 344) A Closed Queueing Network Model for Multi-Echelon Repairable Item Provisioning (with MILLER and SOLAND)

GUPTA, SUSHIL K. (No. 1, 84) see SEN

GUPTA, SUSHIL K. (No. 2, 180) see SEN

HANSEN, DON R. (No. 1, 46) Optimal Production Strategies for Plants with Multiple Shutdown Levels and Multiple Production Lines (with TAYLOR)

HEARN, D. W. (No. 1, 81) see ELZINGA

HODGSON, THOM J. (No. 3, 268) A Note on a Combined Approach to the Pallet Loading Problem (with HUGHES and MARTIN-VEGA)

HOOL, JAMES N. (No. 2, 104) On the Relationship of Sample Size and Moments of Estimators in Simple Linear Regression (with MAGHSOODLOO)

HUDSON, JOSEPH C. (No. 2, 127) Reliability Analysis for Multistate Systems with Multistate Components (with KAPUR)

HUGHES, DIANA SWIFT (No. 3, 268) see HODGSON

IP, TAK-CHAI (No. 2, 150) see FOSTER

JAIN, J. K. (No. 3, 187) see RAOUF
JOHNSON, L. RAY (No. 4, 305) see CHANG

KAPUR, KAILASH C. (No. 2, 127) see HUDSON
KARMARKAR, UDAY S. (No. 1, 5) The Value of Loaners in Product Support (with KUBAT)
KASPI, MOSHE (No. 3, 264) An Improvement of Silver's Algorithm for the Joint Replenishment Problem (with ROSENBLATT)
KHOSHNEVIS, BEHROKH (No. 2, 111) An Aggregate Production Planning Model Incorporating Dynamic Productivity: Part I. Model Development (with WOLFE)
KHOSHNEVIS, BEHROKH (No. 4, 283) An Aggregate Production Planning Model Incorporating Dynamic Productivity: Part II. Solution Methodology and Analysis (with WOLFE)
KIMEMIA, JOSEPH (No. 4, 353) An Algorithm for the Computer Control of Production in a Flexible Manufacturing System (with GERSHWIN)
KLEIN, MORTON (No. 3, 272) A Transportation Model for Production Planning with Convex Costs
KNIGHT, JAMES W. (No. 2, 142) Computer-Aided Design of Fractional Factorial Experiments Given a List of Feasible Observations (with NEUHARDT)
KUBAT, PETER (No. 1, 5) see KARMARKAR

LOWE, TIMOTHY J. (No. 2, 177) see SCHAIBLE

MABERT, VINCENT A. (No. 4, 313) Planning Police Communications Support
MAGHSOODLOO, SAEED (No. 2, 104) see HOOL
MAHONEY, J. F. (No. 2, 156) see BROWN
MALATHRONAS, JOHN P. (No. 3, 195) The Availability of a System of Two Unreliable Machines Connected by an Intermediate Storage Tank (with PERKINS and SMITH)
MARDIS, BARBARA J. (No. 4, 320) see WILSON
MARLIN, PAUL (No. 3, 210) On the Sampling Distribution of the Mode and Its Use with Standard Times
MARTIN, CLARENCE H. (No. 4, 324) Discounted Cash-Flow Analysis of Capacity Expansion Investments by 0-1 Programming
MARTIN-VEGA, LOUIS A. (No. 3, 268) see HODGSON
MAUL, GARY P. (No. 4, 330) A Methodology for Developing Programmable Part Feeders (with GOODRICH)
MAXWELL, WILLIAM L. (No. 3, 235) The Effect of Restricting Cycle Times in the Economic Lot Scheduling Problem (with SINGH)
McGINNIS, L. F. (No. 1, 54) see RAO
MILLER, DOUGLAS R. (No. 4, 344) see GROSS
MUTH, EGINHARD J. (No. 2, 166) The Discrete Laguerre Polynomials and Their Use in Exponential Smoothing

NEUHARDT, JOHN B. (No. 2, 142) see KNIGHT

ONG, KIM LAI-KING (No. 4, 367) see SWEET

PERKINS, JOHN D. (No. 3, 195) see MALATHRONAS

RAO, V. VENKATA (No. 1, 54) Optimal Lot Sizing in Acyclic Multiperiod Production Systems (with McGINNIS)
RAOUF, A. (No. 3, 187) A Cost-Minimization Model for Multicharacteristic Component Inspection (with JAIN and SATHE)
RAZ, TZVI (No. 1, 12) A Method for Sequencing Inspection Activities Subject to Errors (with THOMAS)
ROSENBLATT, MEIR J. (No. 3, 264) see KASPI
ROSENTHAL, RICHARD E. (No. 3, 242) see BRADY

SADOWSKI, RANDALL P. (No. 2, 119) see BUCK
SARIN, SUBHASH C. (No. 1, 37) The Mixed Disc Packing Problem: Part I. Some Bounds on Density
SARIN, SUBHASH C. (No. 2, 91) The Mixed Disc Packing Problem: Part II. An Interactive Optimization Procedure (with AHN)
SATHE, P.T. (No. 3, 187) see RAOUF
SCHAIBLE, SIEGFRIED (No. 2, 177) A Note on a Material Control Problem (with LOWE)
SEN, TAPAN (No. 1, 84) A Branch-and-Bound Procedure to Solve a Bicriterion Scheduling Problem (with GUPTA)
SEN, TAPAN (No. 2, 180) An Improvement for Weiss's Greedy Heuristic (with GUPTA)
SEN, TAPAN (No. 4, 363) An Algorithm for the Single-Machine Sequencing Problem to Minimize Total Tardiness (with AUSTIN and GHANDFOROUSH)
SILVER, EDWARD A. (No. 1, 79) An Example of Indifference Curves in Inventory Control
SINGH, HARPAL (No. 3, 235) see MAXWELL
SIVAZLIAN, B. D. (No. 2, 156) see BROWN
SMITH, GERALD W. (No. 3, 255) Evaluating the New "Investment Tax Credit/Depreciable Basis" Options
SMITH, RICHARD L. (No. 3, 195) see MALATHRONAS
SOLAND, RICHARD M. (No. 4, 344) see GROSS
STIDHAM, SHALER, JR. (No. 4, 292) see ALTIOK
SWEET, ARNOLD L. (No. 4, 367) On a Simple and Accurate Approximation of Control Chart Constants (with ONG)
SZWARC, WLODZIMIERZ (No. 2, 172) The Flow-Shop Problem with Mean Completion Time Criterion

TANCHOCO, JOSE M. A. (No. 1, 19) see BUCK
TAYLOR, SAM G. (No. 1, 46) see HANSEN
THOMAS, MARLIN U. (No. 1, 12) see RAZ

VASILESCU, EUGENE N. (No. 3, 261) An Empirical Evaluation of the "Entrapment" Procedure for Scheduling Jobs on Identical Machines (with AMAR)
VILLARREAL, FRANCISCO J. (No. 4, 337) Scheduling a Single Machine to Minimize the Weighted Number of Tardy Jobs (with BULFIN)

WILSON, HOYT G. (No. 4, 320) Modifying Job Sequencing Rules for Work-in-Progress Inventory Reduction (with MARDIS)
WOLFE, PHILIP M. (No. 2, 111) see KHOSHNEVIS
WOLFE, PHILIP M. (No. 4, 283) see KHOSHNEVIS

YOUNG, DONOVAN (No. 3, 242) see BRADY

Subject Index

0300 ENGINEERING ECONOMICS

0301 Cash Flow Analysis

Discounted Cash-Flow Analysis of Capacity Expansion Investments by 0-1 Programming (No. 4, 324. Clarence H. Martin.

0304 General

Evaluating the New "Investment Tax Credit/Depreciable Basis" Options (No. 3, 255). Gerald W. Smith.

0400 FACILITIES PLANNING, DESIGN

0402 Facility Location

On Stopping Rules for Facilities Location Algorithms (No. 1, 81). D. G. Elzinga and D. W. Hearn.

Interactive Graphical Minimax Location of Multiple Facilities with General Constraints (No. 3, 242). Stephen D. Brady, Richard E. Rosenthal and Donovan Young.

Constrained Location Problems in the Plane and on a Sphere (No. 4, 300). Zvi Drezner.

0600 HUMAN ENGINEERING

0604 Learning

An Aggregate Production Planning Model Incorporating Dynamic Productivity: Part I. Model Development (No. 2, 111). Behrokh Khoshnevis and Philip M. Wolfe.

0606 Personnal Scheduling

Planning Police Communications Support (No. 4, 313). Vincent A. Mabert.

0800 INDUSTRIAL ENGINEERING

0806 IE Management

Optimal Production Strategies for Plants with Multiple Shutdown Levels and Multiple Production Lines (No. 1, 46). Don R. Hansen and Sam G. Taylor.

Practical Productivity Analysis for Management: Part II. Measurement and Interpretation (No. 1, 63). Bela Gold.

An Aggregate Production Planning Model Incorporating Dynamic Productivity: Part I. Model Development (No. 2, 111). Behrokh Khoshnevis and Philip M. Wolfe.

0900 INDUSTRIES

0905 Transportation, Distribution

Fuel Allocation in Processing Copper Ore (No. 3, 217). R. L. Bulfin and T. T. DeMars.

Interactive Graphical Minimax Location of Multiple Facilities with General Constraints (No. 3, 252). Stephen D. Brady, Richard E. Rosenthal and Donovan Young.

1000 MANAGEMENT

1001 Administration

An Aggregate Production Planning Model Incorporating Dynamic Productivity: Part II. Solution Methodology and Analysis (No. 4, 283). Behrokh Khoshnevis and Philip M. Wolfe.

1002 Communications

Planning Police Communications Support (No. 4, 313). Vincent A. Mabert.

1003 Decision Making

The Value of Loaners in Product Support (No. 1, 5). Uday S. Karmarkar and Peter Kubat.

1100 MATERIAL HANDLING

1101 Containers, Unit Loads

A Note on a Combined Approach to the Pallet-Loading Problem (No. 3, 268). Thom J. Hodgson, Diana Swift Hughes and Louis A. Martin-Vega.

1102 Conveyors

A Methodology for Developing Programmable Part Feeders (No. 4, 330). Gary P. Maul and Jerry L. Goodrich.

1107 Methods and System Design

The Mixed Disc Packing Problem: Part I. Some Bounds on Density (No. 1, 37). Subhash C. Sarin.

The Mixed Disc Packing Problem: Part II. An Interactive Optimization Procedure (No. 2, 91). Subhash C. Sarin and Seokyoo Ahn.

1200 METHODS ENGINEERING

120i Automation, Mechanization

An Algorithm for the Computer Control of Production in a Flexible Manufacturing System (No. 4, 353). Joseph Kimemia and Stanley B. Gershwin.

1203 Energy Conservation

Fuel Allocation in Processing Copper Ore (No. 3, 217). R. L. Bulfin and T. T. DeMars.

1300 QUANTITATIVE METHODS

1302 Networks

Mean-Life Indifference Pricing for Quantity Purchases (No. 2, 150). J. W. Foster, III, B. L. Deuermeyer and Tak-Chai Ip.

A Closed Queueing Network Model for Multi-Echelon Repairable Item Provisioning (No. 4, 344). Donald Gross, Douglas R. Miller and Richard M. Soland.

1303 Programming: Linear, Nonlinear

An Algorithm for the Knapsack Problem (No. 1, 31). Umit Akinc.

1304 Regression Analysis

On the Relationship of Sample Size and Moments of Estimators in Simple Linear Regression (No. 2, 104). J. N. Hool and S. Maghsoodloo.

1306 Applied Probability

Optimum Stratified Cycle Counting (No. 2, 119). James R. Buck and Randall P. Sadowski.

Hysteresis Repair in Discounted Replacement Problems (No. 2, 156). J. F. Brown, J. F. Mahoney and B. D. Sivazlian.

The Discrete Laguerre Polynomials and Their Use in Exponential Smoothing (No. 2, 166). Eginhard J. Muth.

The Availability of a System of Two Unreliable Machines Connected by An Intermediate Storage Tank (No. 3, 195). John P. Malathronas, John D. Perkins, and Richard L. Smith.

Markovian Models for Investigating Failure and Repair Characteristics of Production Systems (No. 3, 202). Joseph W. Foster, III, and Alberto Garcia-Diaz.

On the Sampling Distribution of the Mode and Its Use with Standard Times (No. 3, 210). Paul Marlin.

On A Simple and Accurate Approximation of Control Chart Constants (No. 4, 372). Arnold L. Sweet and Kim Lai-King Ong.

1307 Experimental Design

Computer-Aided Design of Fractional Factorial Experiments Given A List of Feasible Observations (No. 2, 142). James W. Knight and John B. Neuhardt.

1400 PRODUCTION AND INVENTORY CONTROL

1403 Inventory Control

Optimal Lot Sizing in Acyclic Multiperiod Production Systems (No. 1, 54). V. Venkata Rao and L. F. McGinnis.

An example of Indifference Curves in Inventory Control (No. 1, 79). Edward A. Silver.

Optimum Stratified Cycle Counting (No. 2, 119). James R. Buck and Randall P. Sadowski.

Column Generation Based Heuristic Algorithm for Multi-Item Scheduling (No. 2, 136). Harish C. Bahl.

Lot Sizing and Several Groups of Single-Cycling Retailers and One Warehouse (No. 3, 223). Amiya K. Chakravarty.

The Effect of Restricting Cycle Times in The Economic Lot Scheduling Problem (No. 3, 235). William L. Maxwell and Harpal Singh.

An Improvement of Silver's Algorithm for the Joint Replenishment Problem (No. 3, 264). Moshe Kaspi and Meir J. Rosenblatt.

Analysis of Buffering Techniques in MRP Systems with a Matrix Loading Model (No. 4, 305). C. Alec Chang, Larry G. Brown, and L. Ray Johnson.

Modifying Job Sequencing Rules for Work-in-Process Inventory Reduction (No. 4, 320). Hoyt G. Wilson, and Barbara J. Mardis.

1405 Production Control

A Note in a Material Control Problem (No. 2, 177). Siegfried Schaible and Timothy J. Lowe.

An Algorithm for the Computer Control of Production in a Flexible Manufacturing System (No. 4, 353). Joseph Kimemia and Stanley B. Gershwin.

1406 Production Planning

Optimal Production Strategies for Plants with Multiple Shutdown Levels and Multiple Production Lines (No. 1, 46). Don R. Hansen and Sam G. Taylor.

The Effect of Restricting Cycle Times in The Economic Lot Scheduling Problem (No. 3, 235). William L. Maxwell and Harpal Singh.

A Transportation Model for Production Planning with Convex Costs (No. 3, 272). Morton Klein.

The Allocation of Interstage Buffer Capacities in Production Lines (No. 4, 292). Tayfur Altiok and Shaler Stidham, Jr.

1407 Production Scheduling

A Branch-and-Bound Procedure to Solve a Bicriterion Scheduling Problem (No. 1, 84). Tapan Sen and Sushil K. Gupta.

The Flow-Shop Problem with Mean Completion Time Criterion (No. 2, 172). Wlodzimierz Szwarc.

An Improvement for Weiss's Greedy Heuristic (No. 2, 180). Tapan Sen and Sushil K. Gupta.

Route-Dependent Open Shop Scheduling (No. 3, 231). I. Adiri and N. Amit.

An Empirical Evaluation of the Entrapment Procedure for Scheduling Jobs on Identical Machines (No. 3, 261). Eugene N. Vasilescu and Amar Dev Amar.

Modifying Job Sequencing Rules for Work-in-Process Inventory Reduction (No. 4, 320). Hoyt G. Wilson and Barbara J. Mardis.

Scheduling a Single Machine to Minimize the Weighted Number of Tardy Jobs (No. 4, 337). Francisco J. Villarreal and Robert L. Bulfin.

An Algorithm for the Single-Machine Sequencing Problem to Minimize Total Tardiness (No. 4, 363). Tapan T. Sen, Larry M. Austin, and Parviz Ghandforoush.

1400 QUALITY CONTROL

1501 Inspection

A Method for Sequencing Inspection Activities Subject to Errors (No. 1, 12). Tzvi Raz and Marlin U. Thomas.

A Cost-Minimization Model for Multicharacteristic Component Inspection (No. 3, 187). A. Raouf, J. R. Jain and P. T. Sathe.

1503 Reliability

Reliability Analysis for Multistate Systems with Multistate Components (no. 2, 127). Joseph C. Hudson and Kailash C. Kapur.

Markovian Models for Investigating Failure and Repair Characteristics of Production Systems (No. 3, 202). Joseph W. Foster, III, and Alberto Garcia-Diaz.

1504 Sampling

Advances in Sequential Bayesian Work Sampling (No. 1, 19). James R. Buck, Ronald G. Askin and Jose M. A. Tanchoco.

Price Adjusted Attribute Single Sampling with Polynomial Indifference (No. 2, 99). B. C. Chang.

On the Sampling Distribution of the Mode and Its Use with Standard Times (No. 3, 210). Paul Marlin.
